

Yellow Galvanized Linch Pin with Round Spring Retainer

Linch pins with round spring rings are simple fasteners for securing items together. The yellow galvanization offers corrosion resistance, suitable for outdoor use.

Product Overview

Versatile Quick-Release Fastening

This yellow galvanized linch pin features an integrated round spring retainer designed for secure, rapid attachment and removal. It is ideal for industrial and agricultural applications requiring frequent equipment assembly or disassembly. The robust construction and specialized protective coating ensure long-term durability in outdoor and challenging environments.

Technical Specifications

Corrosion Resistance

High Resistance • Weatherproof • Outdoor Rated

Surface Coating

Yellow Galvanized

Fastener Style

Linch Pin with Round Spring Ring

Usage Characteristics

Typical Applications

- Agricultural equipment
- Industrial machinery
- Outdoor equipment
- Fast-assembly connections
