

Yellow Oil Tanker Railway Car

This yellow oil tanker railway car is designed for the transportation of oil and other liquids. The tanker features a cylindrical tank mounted on a railway car chassis with wheels.

Overview

Professional Liquid Transport Solution

The G11SK oil tanker railway car is a robust, specialized rail vehicle engineered for the safe and efficient transportation of oil and various liquid commodities. Featuring a distinct yellow cylindrical tank mounted on a durable railway chassis, this car is equipped with standard couplings and braking systems to ensure seamless integration into existing rail logistics networks. Its design prioritizes reliability and heavy-duty performance for industrial liquid transport requirements.

Technical Specifications

Transport Capabilities

- Crude Oil
- Refined Petroleum Products
- Industrial Liquids

Model Type	G11SK Oil Tanker
Identification Markings	82424, 84415

Design Features

Key Design Features

Cylindrical Tank Design • Standard Railway Couplings • Integrated Braking System • High-Visibility Yellow Finish
