

Yellow Zinc-Plated Hanger Bolt

This hanger bolt is designed with a machine thread on one end and a wood screw thread on the other. It is ideal for joining wood to metal in furniture assembly, cabinetry, and construction.

Product Overview

Versatile Fastening Solution

The Yellow Zinc-Plated Hanger Bolt is a specialized fastener designed for seamless integration between wood and metal components. Featuring a machine thread on one end and a robust wood screw thread on the other, it provides a reliable connection for furniture assembly and cabinetry. The yellow zinc plating offers enhanced corrosion resistance, ensuring longevity in various construction and interior applications.
