Product Overview

Professional Grade Sliding Door Hardware

This yellow zinc plated sliding door wheel is engineered for high-performance applications in industrial and commercial environments. Designed with precision to ensure smooth, quiet movement, it features a robust construction that minimizes friction and enhances load-bearing capacity. It is an ideal solution for upgrading or maintaining sliding door, gate, and assembly line systems where durability and wear resistance are critical.

Technical Specifications

Surface Treatment	Yellow Zinc Plated
Primary Material	Metal
Bearing Integration	Yes

Application Areas

Recommended Uses	Industrial Doors, Garage Doors, Washhouse Systems, Assembly Lines, Sliding Gates
------------------	--

Manufacturing Origin

Production Origin	Longyou, Zhejiang, China
-------------------	--------------------------
