

Zinc Alloy Glass Cutter with Blade Storage

This glass cutter features a heavy-duty zinc alloy construction for durability. It has a rubber grip for skidproof handling, a push-button blade release, and spare blades stored in the handle.

Product Overview

Professional Glass Cutting Solution

This heavy-duty glass cutter is engineered from a durable zinc alloy, ensuring longevity and reliable performance for professional tasks. It features an integrated rubberized grip to provide superior skid resistance and comfort during precision cutting. Designed with efficiency in mind, the tool includes a convenient push-button mechanism for quick blade deployment and dedicated on-off storage for spare blades.

Technical Specifications

Material Composition	Zinc Alloy
Grip Material	Rubber

Features

Key Features
