

# Zinc Chloride Alkaline Battery

This alkaline battery provides long-lasting power and reliable performance for various electronic devices. It features robust construction to prevent leakage and ensure safety, with an operating voltage of 1.5V.

## Product Overview

### High-Performance Power Solution

This zinc chloride alkaline battery is engineered to deliver reliable, long-lasting power for a wide range of everyday electronic devices. Featuring a robust, leak-resistant construction, it ensures both safety and consistent energy delivery. It is an ideal choice for high-demand household items such as remote controls, toys, and flashlights.

## Technical Specifications

Voltage	1.5 V
Battery Size	AA
Model Identifiers	SUM3, R6

## Performance

### Performance Class

Extra Heavy Duty • High Performance

## Features

### Primary Advantages

- Robust leakage-prevention construction
- Reliable long-lasting energy output
- Versatile application for standard consumer electronics
