

Zinc Coated Steel Wire

This high-tensile, zinc coated steel wire is suitable for various applications including fencing, binding, and construction. The durable zinc coating enhances corrosion resistance and ensures reliable performance in demanding environments.

Product Overview

High-Tensile Galvanized Steel Wire

This high-tensile zinc coated steel wire is engineered for durability and versatility in demanding environments. Featuring a robust zinc coating, it offers superior corrosion resistance, making it an ideal choice for fencing, binding, and various construction applications. Its combination of strength and flexibility ensures reliable performance across a wide range of professional projects.

Technical Specifications

Material	Galvanized Steel
Coating	Zinc
Key Features	High-Tensile, Corrosion Resistant, Flexible, Durable

Applications

Recommended Applications

- Fencing
- Binding
- Construction
