Product Overview

Professional Hollow Wall Fastening Solution

This zinc-plated steel hollow wall anchor is engineered for secure, reliable fastening in drywall and other hollow substrate materials. Its robust construction ensures high corrosion resistance and durability for long-term installations. The anchor features an expanding wing design that grips the interior of the wall, providing superior pull-out resistance for mounting shelves, fixtures, and hardware.

Technical Specifications

Installation Compatibility

- Drywall
- Hollow wall materials

Material & Finish

Zinc-plated steel

Key Features

Corrosion Resistant, Expanding Wings, High Pull-out Resistance, Includes Screw
