

Zinc-Plated Steel Sleeve Anchor

This heavy-duty sleeve anchor ensures secure fastening in concrete, brick, and block. It features zinc-plated steel construction, providing corrosion resistance and reliable holding power for structural supports, machinery mounting, and general anchoring.

Product Overview

Heavy-Duty Sleeve Anchor

This zinc-plated steel sleeve anchor is engineered for secure fastening applications in concrete, brick, and block substrates. Designed for reliability and durability, it features a robust construction comprising a threaded bolt, expansion sleeve, washer, and nut. It provides exceptional holding power suitable for structural supports, machinery mounting, and general anchoring needs, making it an ideal choice for both indoor and outdoor professional projects.

Technical Specifications

Corrosion Resistance

Corrosion Resistant

Assembly Components

- Threaded bolt
- Expansion sleeve
- Washer
- Nut

Material & Finish

Zinc-Plated Steel

Suitable Substrates

Concrete, Brick, Block

Usage & Applications

Common Applications

- Structural supports
- Machinery mounting
- General anchoring

Environment Suitability

Indoor, Outdoor
