

Zirconia Flap Disc with Fiberglass Backing

Zirconia flap discs are designed for grinding, blending, and finishing on various materials. They feature a fiberglass backing for enhanced strength and stability during use.

Product Overview

High-Performance Zirconia Flap Discs

These zirconia flap discs are engineered for professional-grade grinding, blending, and finishing tasks. Featuring a durable fiberglass backing, they provide superior stability and strength during operation. Designed for heavy-duty use in metalworking, welding, and construction, these discs offer aggressive material removal and a long service life.

Technical Specifications

Compliance

EN13743

Backing Material

Fiberglass

Abrasive Material

Zirconia
