

# Zirconium Corundum Abrasive Cloth Roll

This emery cloth roll is constructed with zirconium corundum abrasive cloth, cotton X, and a resin mixture. It is suitable for manufacturing abrasive cloth wheels and belts, and is especially suitable for polishing stainless steel and heat-resistant steel.

## Product Overview

### High-Performance Abrasive Solution

This zirconium corundum abrasive cloth roll is engineered for heavy-duty grinding, sanding, and surface finishing applications. Featuring superior durability and aggressive cutting action, it is designed for demanding tasks on both metal and wood substrates. Its flexible cloth backing ensures excellent conformability while maintaining high tear resistance for consistent performance in industrial environments.

## Technical Specifications

### Primary Applications

- Heavy-duty sanding
- Grinding
- Surface finishing

### Compatible Equipment

- Hand sanding blocks
- Orbital sanders
- Belt sanders

Available Grit Sizes	36, 40, 50, 60, 80, 100, 120
Roll Dimensions	1.4m x 100m
Abrasive Material	Zirconium Corundum
