

Zirconium Oxide Fiber Disc 0.6-0.8mm

Zirconium oxide fiber discs are designed for grinding and finishing applications. These discs feature a durable fiber backing and high-quality zirconium oxide abrasive for efficient material removal on metal, wood, and other materials.

Product Overview

High-Performance Zirconium Oxide Fiber Discs

These Zirconium Oxide Fiber Discs are engineered for demanding grinding and finishing applications across a wide range of materials. Designed for versatility, they are suitable for both steel and non-steel surfaces, providing efficient material removal and consistent performance. Whether you are clearing paint, removing burrs, or cleaning welding seams, these discs offer the durability required for professional industrial tasks.

Physical Specifications

Available Thicknesses

- 0.6mm
- 0.8mm

Applications

Key Applications

Dust Removing, Paint Clearing, Burr Removing, Welding Seam Clearing

Compatibility

Suitable Materials

Steel • Non-Steel Metals • Wood
