

Zirconium Oxide Grinding Disc

This grinding disc features a durable zirconium oxide abrasive for efficient material removal and surface preparation. The disc is designed with a multi-hole pattern for effective dust extraction and is suitable for use with angle grinders and other compatible power tools.

Product Overview

High-Performance Zirconium Oxide Grinding Disc

This zirconium oxide grinding disc is engineered for heavy-duty material removal, surface preparation, and finishing across a wide spectrum of materials including metal, wood, and plastic. It features high-purity abrasive grains that offer exceptional abrasion resistance, chemical inertness, and thermal stability for consistent performance in demanding high-temperature environments. Designed for compatibility with angle grinders, the disc incorporates an efficient multi-hole pattern to optimize dust extraction and maintain a cleaner, safer workspace.

Technical Specifications

Key Performance Attributes

- High stock removal rate
- Exceptional abrasion resistance
- Excellent surface finish
- Superior thermal stability
- Chemical inertness

Abrasive Material	High-purity Zirconium Oxide
Compatible Materials	Metal, Wood, Plastic
Dust Management	Yes
Tool Compatibility	Angle grinders and compatible power tools
