

ZX7-200 Welding Machine

This welding machine is designed for various welding applications. It features adjustable welding current, power indicator, and thermal overload protection.

Overview

Professional Performance and Versatility

The ZX7-200 welding machine is a robust and versatile tool engineered to handle a wide range of welding applications. It offers precise control through an adjustable welding current system, ensuring high-quality results for both professional contractors and DIY enthusiasts. With built-in thermal overload protection and a clear power indicator, this unit combines reliability with user-friendly operation.

Technical Specifications

Welding Current

200 A

Max Welding Current

Safety Features

Thermal Overload Protection, Power Indicator

Operating Features

Interface Elements

- Adjustable Welding Current
- Power Indicator
- Power Switch (ON/OFF)
- Weld/Pulse Current Selection

User Suitability

Professional Use • DIY Projects
